SpectraCall Covert Cellular Body Wire provides clear live audio recording with secure remote monitoring

SpectraCall is a powerful tool for monitoring and tracking all surveillance operations.

All data is uploaded to our secure, Law Enforcement exclusive server.

SpectraCall mobile phones monitor conversations, track GPS Location, record Text and Call Logs, record Live Calls and much more.

SpectraCall runs entirely in the background, discreetly, even responding to invisible remote Text commands, and offers remote settings configuration from our powerful, easy to use web panel.

SpectraCall offers unlimited minutes in multiple user levels tailored to your Agency or Department's unique surveillance needs.

SpectraCall is a cellular-based software service that features the following:

- Turn a mobile phone into a body wire using the cellular infrastructure to transmit audio.
- Functions on any Android phone. Use your existing equipment. No hardware to purchase.
- Record and monitor all phone calls, incoming or outgoing, along with all ambient sound.
- No need for a controlled 3-way call, or for dialing up any phone.
- The application runs in the background.
- Evidence is kept in a secure, encrypted Cloud-based storage server.
- Track and route GPS locations.

Upgrade to SpectraCall + Plus for many more features:

- Record text messages and social media messages, such as Facebook, Skype, Twitter, Snapchat, WhatsApp, VK, Telegram, Line and Viber.
- Uploads videos and photos.
- Record calls, photos and videos on SD memory card.
- Track and manage GPS coordinates, geo-fence and route information.
- Track WiFi access locations.
- Manage admin functions, such as browser history, calendar, key logging and contacts.
- Send announcements and remote commands.
